Adam Plesník

Product designer

Product designer for critical interfaces, where complexity isn't optional

I designed a flight management system for a national air traffic service provider and modernized a legacy flight planning tool used by four national clients. I also worked on EFS and other ATC tools, and I led a shipped investigator's application for synchronized radar, video and audio playback, from research to build oversight.

For 12 years I was the designer on a wealth management platform for top European private banks: payments, securities ordering, reporting, KYC, risk and compliance.

Based in Bratislava, Slovakia. Available for remote work.

Figma	Wireframes, high-fidelity mockups, prototypes, motion, design systems, variables and modes
AI	AI-assisted prototyping with Figma Make
Front-end	Git, React + TSX, HTML, CSS & Tailwind CSS
Languages	Slovak (native), English (fluent), French (B1)
